

Success Estimator

Save time and money while delivering a superior project with **a single, proven estimating solution**

It's time to gain complete control of your estimating process ... with a proven solution which utilizes innovative technology while seamlessly integrating with your enterprise cost control applications. In 1991, U.S. COST was the first company to offer a Windows-based estimating software product. Today, **Success Estimator** has gained a worldwide base of loyal construction clients who enjoy its unparalleled combination of off-the-shelf estimating functionality and customization capability.

Key Features & Benefits

Improved and Accelerated Estimate Creation

Success Estimator offers a visually logical work breakdown structure with unlimited built-in flexibility. Its robust organization allows you to quickly make global adjustments to any project. From conceptual cost models to detailed "bottom-up" estimating ... **Success Estimator** conforms to your needs, *helping you build a better estimate.*

Centralized Cost Databases

Instantly access R.S. Means, Richardson, Saylor and your company's legacy cost data for detail and smart assemblies, *generating up-to-date cost estimates faster than ever before.* Use **Success Estimator's** powerful modeling capabilities with your legacy data and engineering algorithms *to develop more meaningful and accurate cost models.*

A Fully Integrated Solution

Send estimate data to downstream project control applications, *increasing the efficiency of your project team.* Accelerate the takeoff process using On Screen Takeoff from Oncenter. Send information to and from Primavera P6 or create estimates directly from Autodesk's Revit modeling software.

Comprehensive Analysis

Perform actual to estimate analysis. Compare cost trends and variances across multiple projects. With 40+ predefined reports and an ad-hoc report writer, **Success Estimator** offers complete visibility to *effectively analyze your projects.*

"Burns & Roe has relied on **Success Estimator** for over 7 years. The software services team has provided a variety of custom components such as macros and reports, which have facilitated our process very well. We save **time, money** and **most importantly, we deliver a superior product to our clients.**"

— Vern Peterson
Supervising Estimate Engineer
